

ITW2 PROJECT

Hospital Management System

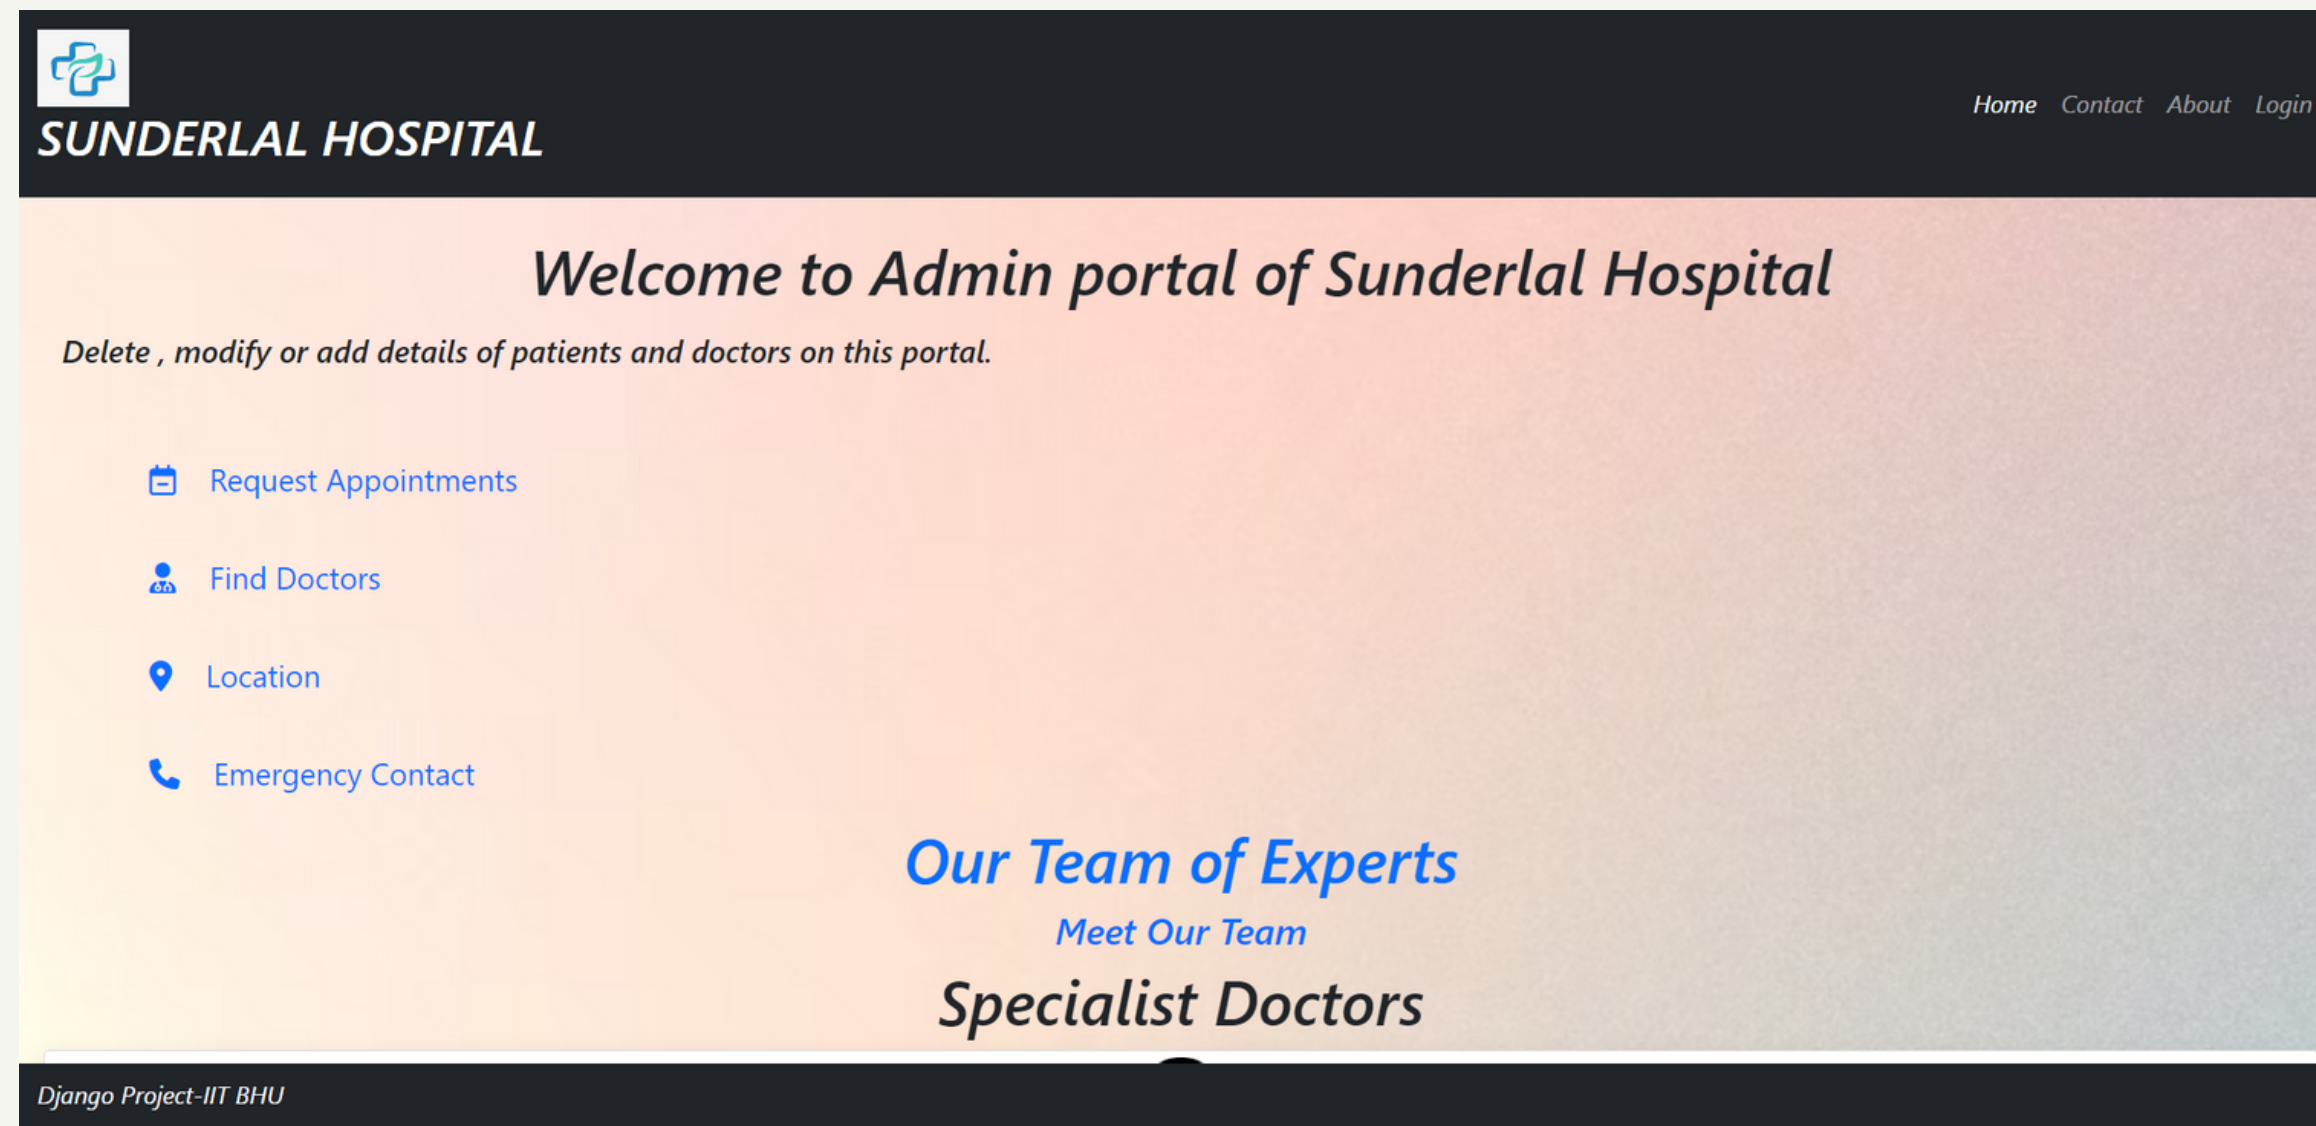

- Abhay Singh
- Abhay Saxena

An admin portal of a Hospital for modifying and storing details.

**We have developed a
website based on
Django , HTML and
python. We have also
used Bootstrap for our
frontend.**

Home Page

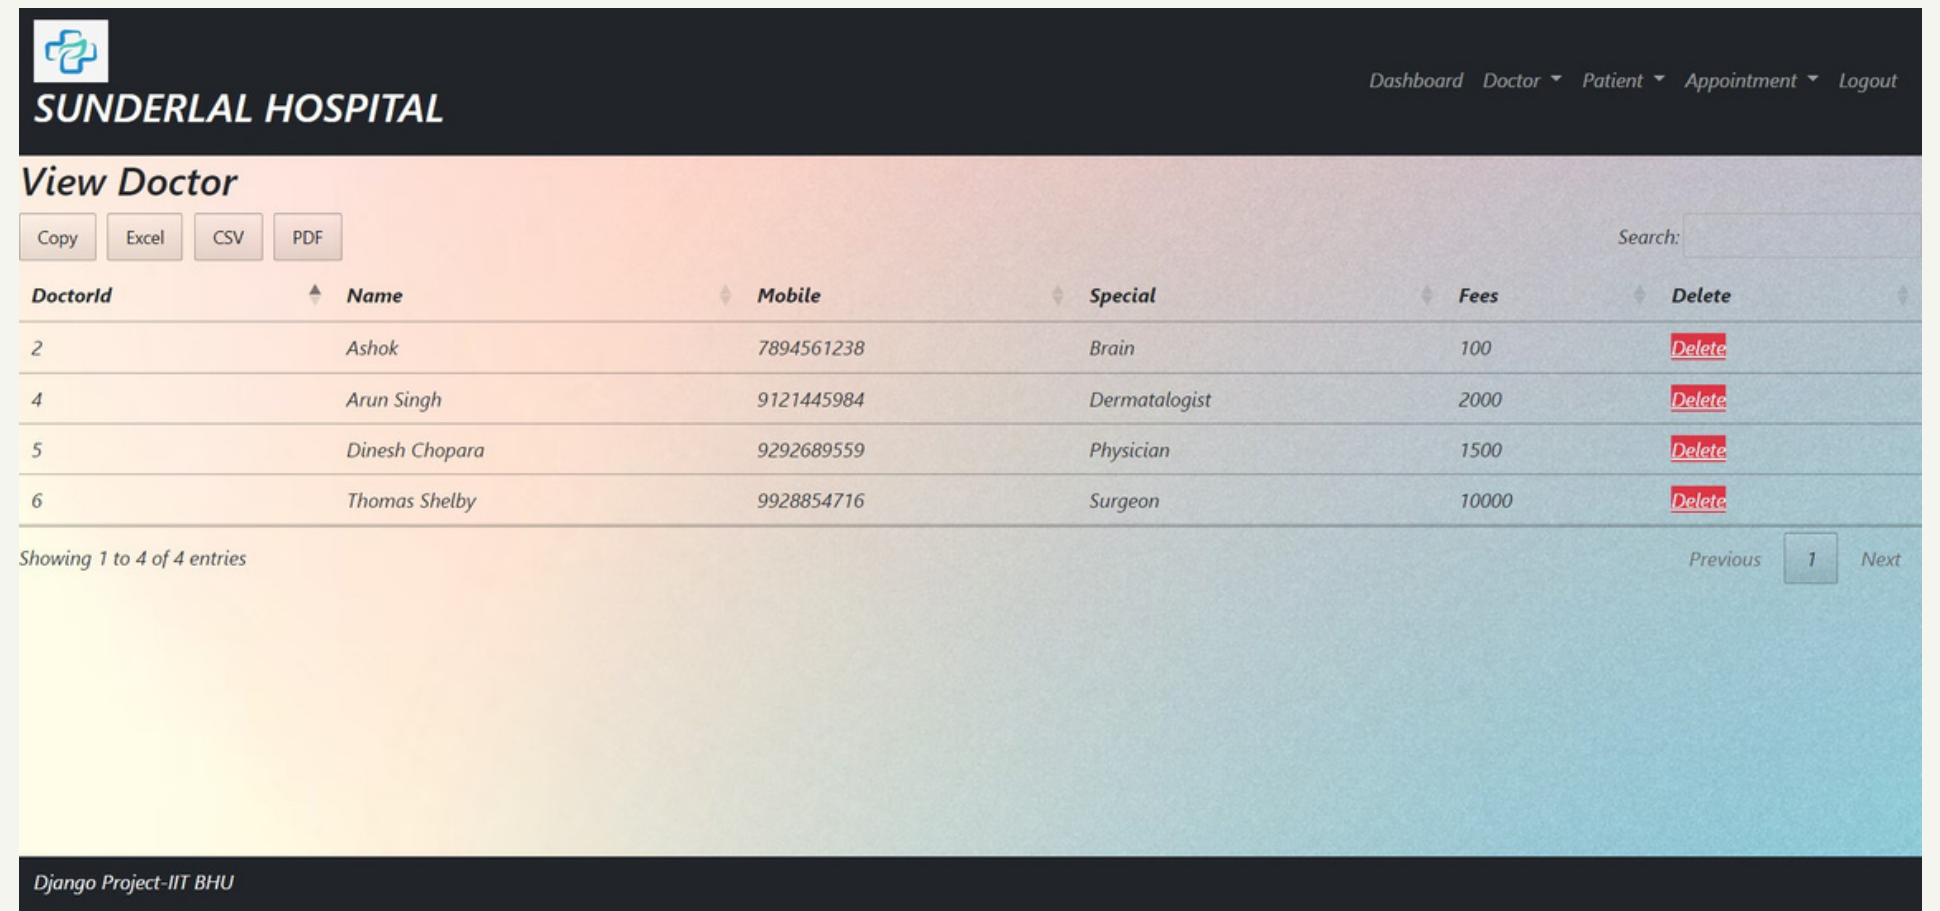

This is our home page using the navigation handle on the top right corner we can view and modify details of patients, doctors and appointments.

The details pages

We can see the details of the appointments, doctors and patients separately.

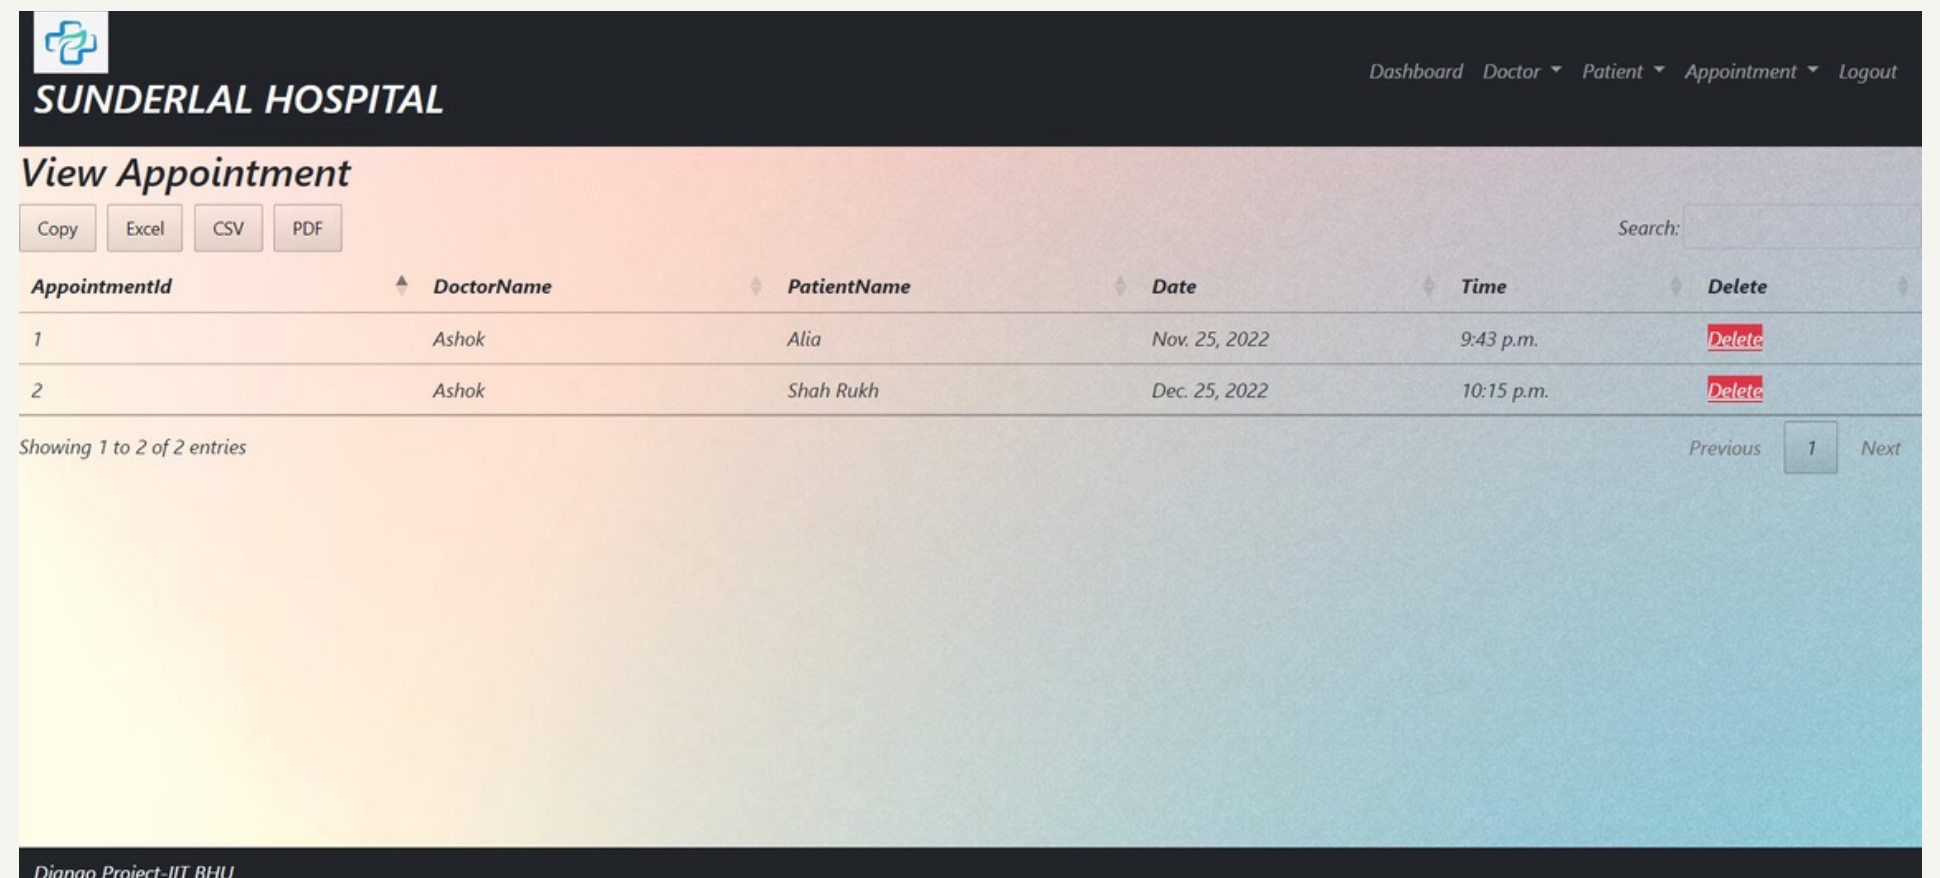

Also we can download the details in.csv,.pdf and excel format.

DoctorId	Name	Mobile	Special	Fees	Delete
2	Ashok	7894561238	Brain	100	Delete
